[github.com/trustedtech](https://github.com/trustedtech)

Full Stack Web Developer and Digital Creator who's passionate about producing digital solutions that motivate people and take businesses to the next-level. Graduate of UCF Coding Bootcamp who also leverages career experience in Project Management, Systems Engineering, and Client Relationships. Self-motivated, reliable, and highly-effective.

## HIGHLIGHTS

- ★ Veteran Wordpress engineer with 6+ original sites built and launched.
- ★ Two-time winner of 'Best Project' as voted by faculty and peers.

## EXPERIENCE

### Systems Engineer / Webmaster

Rhino Technologies – *Altamonte Springs, FL* ( Oct 2011 – Mar 2020 )

- Lead website development projects through all phases of lifecycle – engage, design, build, test, launch, maintain, optimize/enhance.
- Direct and manage all website operations – domains, hosting, DNS, FTP, SSL, backup/recovery/rescue.
- Engineer special projects – wireless networks, MDM, web/FTP servers, high-end custom workstations; Perform full network installations.
- Conduct research, compile data, and prepare proposals for executives and other stakeholders.

### Systems Engineer

Broad & Cassel – *Orlando, FL* ( Sep 2006 – Jul 2011 )

- Develop the capabilities of an incident-tracking software (Capterra cSupport), including administration of a complex SQL database and building custom reports with Crystal Reports.
- Overhaul Active Directory, implementing a more succinct OU structure and reworking all GPOs to improve related processes and performance.
- Engineer and standardize workstation images – bundle software, embed configurations, script tasks, coordinate multiple system layers.

### Sr. Technician

United Parcel Service – *Pittsburgh, PA* ( Nov 1999 – Aug 2006 )

- Support enterprise technologies concerning all internal operations; Train and supervise fellow technicians. Maintain clear documentation.
